(*a*) Excludes expenditure from Hospital Trust Fund in respect to which a special Hospital Tax was introduced in 1930–31 · this tax was abolished at end of 1941–42 under the States Grants (Income Tax Reimbursement) Act, and annual amounts are paid to the Hospital Trust Fund from the money received from the Commonwealth (Table No. 8, page 15). (*b*) Including Aboriginal Cattle Stations. (*c*) Administered by State Electricity Commission as from 1946–47. (*d*) Now taken over by Supply and Shipping. (*e*) "Unemployment Relief" only as from and including 1946–47. *Revised. † Combined under heading of " State Abattoirs " as from 1945–46.

No. 6.—Consolidated Revenue—Expenditure and Receipts CLASSIFIED ACCORDING TO FUNCTION, 1948–49 and 1949–50.

The general purport of this table is to show the net cost, including the relevant portion of Public Debt service, of each *function* of Government, irrespective of the department or departments administering such functions. It should be noted that *Expenditure on Hospitals* is met mainly from the Hospital Trust Fund, into which are paid annual amounts which are allocated to the fund under States Grants (Tax Reimbursement) Acts. Receipts shown for the Item *Roads and Bridges* comprise interest and sinking fund paid by the Main Roads Board on loan capital advanced by the Treasurer in respect to certain Metropolitan roads. *Rural and Industries Bank* expenditure from Consolidated Revenue is confined to meeting Public Debt charges. The receipts shown represent the Bank's contribution towards interest and sinking fund on loan capital advanced by the Treasurer. Receipts shown for the item *Navigation, Harbour and Lights* represent, largely, contributions by the Fremantle Harbour Trust on account of interest and sinking fund on loan capital, together with surplus Profits. Expenditure from consolidated revenue in respect to the *Metropolitan Market Trust*, the *State Housing Commission* and certain *Business Undertakings* such as the *State Electricity Commission* and *Charcoal Iron and Steel Industry* covers only Public Debt Charges, and receipts shown represent amounts paid to revenue on account of such charges, current or accrued.

TRADE OF WESTERN AUSTRALIA.

Year ended 30th June, 1950.

In the following summary of the external trade of Western Australia all values are in Australian Currency, and details in parenthesis refer to the previous year.

1.—Summary.

The post-war upward trend in trade values has been maintained, the total value for 1949–50 being £131,309,313 (£108,222,686). Although total exports, including Ships' Stores, increased by £6,271,796 to £61,865,636, this gain was far exceeded by the growth of external purchases which rose from £52,628,846 in 1948–49 to £69,443,677 in 1949–50. The net result was an adverse nominal balance of trade of £7,578,041—the second in the post-war period. However, in assessing the significance of the unfavourable result of the year's trading it should be noted that no gold bullion was exported from the State during 1949–50—in Table No. 9 (Column E) Gold production is taken into account for the purpose of computing trade balances of the State.

An unusual feature of trade with the United Kingdom was an adverse balance of £759,656—for the previous year a favourable balance of £10,122,078 was recorded. Trade with the Other States of the Commonwealth resulted in an unfavourable balance of £27,409,071—a normal feature of interstate commerce. Trade with other British and Foreign Countries showed favourable balances of £8,905,556 and £9,378,691, respectively.

The trend in the value of the State's trade over the past five years is shown in the following table—exports and total trade expressed as percentages of the corresponding figures for 1938–39.

Note.—As the base of each column has been equated to the same value, *viz.*, 100, direct horizontal comparisons are not valid.

No allowance having been made for inflationary price movements, the above figures are not indicative of trends in volume of trade. Some idea of the latter for goods transported by sea can be obtained from Table No. 28.

2.—Imports.

External purchases rose by £16,814,831 from £52,628,846 to £69,443,677. Of this total £35,021,886 (£30,591,245) represented goods from the Eastern States (including those of Oversea origin) and £34,421,791 (£22,037,601) direct purchases from oversea countries. It will be seen therefore that the increase in the total value of imports is largely due to the steep rise in purchases from ex-Australian sources which accounted for £12,384,190 of the increase.

Imports of Motor Cars and Trucks (including parts thereof) valued at £7,589,820 (£4,060,479) and Machinery, £13,128,652 (£8,291,219) were important factors contributing to the higher value of purchases. Other items for which increases were recorded during 1949–50 and their total Import values were Meats Preserved in Tins, £197,241 (£87,158); Cheese, £215,993 (£164,332); Vegetables Preserved in Liquid, £189,358 (£98,404); Tea, £716,670 (£581,135); Confectionery, £657,761 (£549,778); Manufactured Tobacco, £770,209 (£628,215); Cigarettes, £854,661 (£735,877); Live Animals, £466,067 (£287,474); Bags and Sacks, £1,488,605 (£1,365,087); Piece Goods, £3,414,355 (£3,193,679); Boots and Shoes, £1,118,420 (£974,659); Other Wearing Apparel, £4,331,663 (£3,735,868); Petrol, £2,162,933 (£1,486,352); Kerosene, £526,100 (£373,829); Lubricating Oil, £611,634 (£410,517); Sulphur, £663,903 (£229,817); Iron and Steel, £2,673,023 (£1,403,633); Motor Tyres and Tubes, £1,494,084 (£1,027,135); Rock Phosphates, £1,010,616 (£636,224).

Substantial decreases were recorded in Jams and Jellies, £173,261 (£270,413); Timber, £180,035 (£253,770); and Paper, Paper Pulp and Paper Board, £892,629 (£1,104,315).

Imports from the Other States of the Commonwealth rose to £33,619,596 (£29,127,917) and from the United Kingdom to £18,944,881 (£11,625,088). Other important suppliers amongst British countries were India, £2,174,125 (£1,850,626); Malaya and Singapore, £1,586,181 (£916,019); Canada, £641,923 (£566,408); and Ceylon, £467,047 (£482,217). Foreign countries from which important purchases were made were the United States of America, £2,847,232 (£1,842,341); Indonesia, £2,171,459 (£1,379,652); Iran (Persia), £1,276,539 (£1,697,907); Italy, £955,540 (£86,004); Germany, £672,504 (£48,800); France, £456,904 (£102,209); and Japan, £431,352 (£47,195). The reappearance of Italy, Germany and Japan as important oversea suppliers of goods to this State is worthy of note.

3.—Exports.

The total value of exports, including ships' stores, rose from £55,593,840 in 1948–49 to £61,865,636 in the year under review. The increase of £6,271,796 was largely due to higher aggregate export values for Wheat which realised an additional £2,642,197, and Wool which realised £3,967,276 more than in 1948–49, although the volume of exports rose by only 1,483,785 lb.

Exports to countries within the British Commonwealth, including the Other Australian States, totalled £39,781,211 (£35,987,290). Purchases by the United Kingdom fell from £21,747,166 to £18,185,225, but exports to the Other Australian States rose to £6,210,525 (£4,747,502), while sales to Other British Countries increased by £5,892,839 to £15,385,461. Principal customers in the latter group were India, £8,892,085 (£3,607,494); Malaya and Singapore, £3,039,346 (£2,315,145); and Ceylon, £1,157,107 (£1,398,767). Foreign countries purchased goods valued at £19,724,385 (£17,251,344), leading buyers being the United States of America, £3,630,869 (£2,810,776); Egypt, £2,635,239 (£1,784,131); France, £2,450,740 (£4,560,456); Japan, £1,896,365 (£1); Belgium, £1,816,866 (£1,660,615); and Germany, £1,077,203 (£136,933).

Hereunder are notes on the principal export items:—

Wool, Greasy.—Strong oversea demand for Australian wool was maintained during 1949–50 and the average f.o.b. value for greasy rose from 51·28 pence per pound to 57·65 pence per pound. Although the quantity of greasy wool exported fell to 83,405,237 lb. (85,919,353 lb.) the higher average price resulted in an increased aggregate value of £20,035,466 (£18,358,654).

The United Kingdom, which was again the leading buyer of Western Australian wool, took 40,490,793 lb. valued at £9,339,128. Other substantial sales were made to the United States of America, 11,881,622 lb., £3,017,799; France, 8,187,597 lb., £1,717,680; Belgium, 5,747,436 lb., £1,335,050; Poland, 4,347,957 lb., £1,270,146. The Other Australian States, 4,082,631 lb., £945,039; and Germany, 2,882,588 lb., £719,578.

Wool, Scoured.—The volume of scoured wool exported rose by 3,902,127 lb. to 17,490,562 lb. and realised 74·46 pence per pound f.o.b., the resultant aggregate f.o.b value being £5,426,116 (£3,176,250).

The principal buyer was the United Kingdom which purchased 10,137,881 lb. valued at £2,958,407.

Wheat.—Exports during 1949–50 totalled 21,508,755 bushels (18,401,445 bushels) for a total f.o.b. value of £16,692,007 (£14,049,810). The average f.o.b. value per bushel was 15/6·25, a slight rise on the previous year when an average of 15/3·24 per bushel was realised.

India, which purchased 10,302,995 bushels valued at £7,960,538, was the principal wheat buyer. Other important customers were the United Kingdom, 3,730,760 bushels, £2,405,585; Egypt, 2,526,192 bushels, £2,151,140; Japan, 1,382,728 bushels, £1,419,233; and South Africa, 1,126,455 bushels, £648,607.

Flour (Wheaten).—The State's export flour trade declined from 2,624,056 centals valued at £5,258,078 in 1948–49 to 2,316,287 centals for £4,167,598 in the year under review.

Principal customers were Malaya and Singapore, 634,009 centals, £1,102,187; Ceylon, 575,410 centals, £1,048,122; and India, 482,178 centals, £849,015. The United Kingdom, which in 1948–49 received 595,238 centals, did not import Flour from this State during 1949–50.

Timber.—34,295,340 super feet of timber were exported during 1949–50 compared with 38,378,531 super feet in 1948–49 and 68,450,996 in the last pre-war year. Exports to the Eastern States totalled 22,971,259 super feet (24,719,972 super feet), including 6,026,336 super feet (6,070,735 super feet) of sleepers. Oversea countries received 11,324,081 super feet (13,658,559 super feet) or under one quarter of 1938–39 supplies which totalled 48,640,801. The State's leading ex-Australian timber buyers during 1949–50 were the Union of South Africa, 4,301,534 super feet (5,147,230 super feet) and the United Kingdom, 3,863,033 super feet (3,065,163 super feet).

Sales of timber to the Eastern States were valued at £552,017 (£474,418) and purchases by oversea countries realised £450,921 (£534,880).

Apples.—Exports totalled 296,998 centals (281,945 centals) valued at £670,686 (£580,665).

Important buyers during 1949–50 were Other Australian States, 80,294 centals, £159,555 ; Malaya and Singapore, 56,233 centals, £175,595 ; United Kingdom, 53,142 centals, £104,307 ; Germany, 44,258 centals, £94,047 ; and Sweden, 40,621 centals, £86,324.

Fish.—Exports of fish during the year fell to 3,306,551 lb. (4,054,163 lb.) valued at £423,955 (£506,365). The export figures, however, cannot be taken as an indication of a downward trend in the fishing industry, as shipments of almost one million lb. of frozen crayfish tails were recorded in July and August, 1950, part of which probably represented carry-over which normally would be exported prior to the 30th June.

The total for 1949–50 includes 1,143,235 lb. of crayfish tails sent oversea valued at £231,659 of which 1,058,355 lb. for £220,750 went to the United States of America. Exports to the Eastern States included 218,900 lb. preserved by cold process valued at £19,547 and 1,879,219 lb. of tinned fish which realised £165,302.

Beef.—17,325,454 lb. of frozen beef valued at £531,835 was consigned to the United Kingdom compared with 15,651,075 lb. for £354,756 in 1948–49.

Total exports for the year were 18,993,314 lb. (17,718,558 lb.) for an f.o.b. value of £590,718 (£418,700).

PART IV.—TRADE, TRANSPORT AND COMMUNICATION.

1.—TRADE AND CUSTOMS.

Prior to the 15th November, 1947, Oversea Imports were valued in British currency and represented the F.O.B. value at Port of Shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following an amendment to the Act, Oversea Imports have been valued in Australian currency F.O.B. Port of Shipment. In this Register all Oversea Imports are valued on the revised basis (values for the periods prior to 15th November, 1947, being re-computed) and, as Interstate Imports and all Exports have always been recorded in Australian currency, the values throughout are now expressed in uniform terms.

(For use with Tables 5 and 6)

STATISTICAL CLASSIFICATION OF IMPORTS AND EXPORTS ACCORDING TO STATISTICAL CLASSES.

Classes.	Item Numbers.
Class 1.—Foodstuffs of Animal Origin, not including Live Animals	0001–0299
Class 2.—Foodstuffs of Vegetable Origin ; Non-Alcoholic Beverages, and Substances used in making	0300–0699
Class 3.—Spirituous and Alcoholic Liquors	0700–0799
Class 4.—Tobacco and Preparations thereof	0800–0899
Class 5.—Live Animals	0900–0999
Class 6.—Animal Substances (mainly unmanufactured), not Foodstuffs	1000–1299
Class 7.—Vegetable Substances and Fibres ; Cork and Manufactures ; Plastic Moulding Materials and Synthetic Fibres	1300–1999
Class 8(*a*).—Yarns and Manufactured Fibres	2000–2199
Class 8(*b*).—Textiles	2200–2599
Class 8(c).—Apparel	2600–2999
Class 9.—Oils, Fats and Waxes	3000–3299
Class 10.—Pigments, Paints and Varnishes	3300–3599
Class 11.—Rocks, Minerals (including ores and concentrates), and Hydrocarbons in solid or semi-solid form	3600–3999
Class 12(*a*).—Metals and Metal Manufactures (except Electrical Appliances and Machinery)	4000–5099
Class 12(*b*).—Dynamo Electrical Machinery and Electrical Appliances and Equipment not being Machinery	5100–5399
Class 12(*c*).—Machines and Machinery (except Dynamo Electrical)	5400–5999
Class 13(*a*).—Rubber and Rubber Manufactures (except Apparel)	6000–6099
Class 13(*b*).—Leather and Leather Manufactures and Substitutes therefor (except Apparel)	6100–6299
Class 14.—Wood and Wicker, raw and manufactured	6300–6699
Class 15.—Earthenware, Cement, China, Glass and Stoneware	6700–6999
Class 16(*a*).—Pulp, Paper and Board	7000–7199
Class 16(*b*).—Paper Manufactures and Stationery	7200–7399
Class 17.—Sporting Material, Toys, Fancy Goods, Jewellery and Timepieces	7400–7599
Class 18.—Optical, Surgical and Scientific Instruments and Appliances and Photographic Goods, N.E.I.	7600–7999
Class 19.—Drugs, Fertilizers and Chemicals	8000–8999
Class 20.—Miscellaneous	9000–9599
Class 21.—Gold and Silver ; Bronze Specie	9600–9629

No. 5.—IMPORTS into the State, during the Year ended 30th June, 1950.

Note A.—Prior to the 15th November, 1947, Oversea Imports were valued in British currency, and represented the F.O.B. value at port of shipment plus the statutory 10 per cent. imposed for value for duty purposes, in accordance with the Customs Act. From the 15th November, 1947, following on amendment to the Act, the 10 per cent. addition has been eliminated and Oversea Imports have been valued in Australian currency F.O.B. port of shipment. On all Interstate Imports 10 per cent. has been added to the F.O.B. value at the port of shipment.

Note B.—The "quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

Note C.—The following abbreviations are used throughout this table:—

N.E.I. means "Not elsewhere included."

N.E.S. means "Not elsewhere specified."

Note D.—The following record of Imports has been compiled according to a Statistical Classification divided into 21 Classes, which came into operation on the 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages 17–39.

No. 6.—EXPORTS from the State during the Year ended 30th June, 1950.

Note A.—The value of goods exported is recorded in Australian currency. The basis of valuation is f.o.b., or its equivalent, at port of shipment.

Note B.—The "Quantity" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size and consequently do not indicate the number, capacity or weight of articles exported.

Note C.—The following abbreviations are used throughout this table:—
N.E.I. means "Not elsewhere included."
N.E.S. means "Not elsewhere specified."

Note D.—The following record of Exports has been compiled according to a Statistical Classification divided into 21 classes which came into operation on 1st July, 1945. A list of the classes which comprise the Statistical Classification and an extensive Alphabetical Index of Imports and Exports are given on pages 17-39.

* Prior to 1942–43 the acreages under "Vineyards" and 'Orchards" have been compiled on the basis of the actual number of Vines and Fruit Trees planted, according to the standard suggested by the Department of Agriculture, viz., 450 vines or 100 fruit trees to the acre. For subsequent years actual areas stated by growers have been used. † Including "Small Fruits," and Passion Vines." (*a*) Including Meadow Hay (the figures for 1949–50 being 38,279 acres). (*b*) Includes Multiple Croppings (mainly Vegetables and Cover Crops).

(*a*) No wheat exported. Local Metropolitan Market price (Average of Monthly average prices for year ended 30th November). (*b*) Severe drought year. (*c*) For six months ended 30th June. (*d*) Price of greasy wool appraised by Central Wool Committee (including adjustments). (*e*) Average Value based on wheat exported for fiscal year ended 30th June.

VI.—VALUE OF PRODUCTION.

NET VALUE—

The Annual Net Value of Production represents the sum available each year for distribution among those concerned in industry, i.e., workers, proprietors (including landlords), and providers of capital.

In combining industries this is the value that is used in order to avoid the inevitable duplication that would result if "Gross" or "Local" values were aggregated.

I. PRIMARY PRODUCTION.

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realised "at the principal market." In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the "principal market."

(*b*) *Marketing Costs*, which are deducted from "Gross Value" to obtain "Local Value," comprise Freight, Cost of Containers, Commission, and other handling charges.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting "Marketing Costs" from "Gross Value."

(*d*) *The Value of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, repairs, and similar costs, and is deducted from "Local Value" to obtain "Net Value."

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) after deducting from "Local Value" the "Value of goods consumed in the process of production." Such return is the sum available for payment of wages, interest, rent, and producer's own income.

II. MANUFACTURING.

The initial value taken is that of Output "at factory door." The *Net Value of Manufacturing*, comparable with the net value of primary production, is the value added during the course of manufacture or treatment and is computed by deducting from output value the value of "goods consumed in process of production," viz.: materials used; power, fuel and light; repairs, lubricating oil and water; containers, packing, etc. In other words, it represents the sum available to the manufacturer for providing for wages, rent, interest, depreciation, certain other costs (such as advertising and insurance), and for his own income.

III. GENERAL.

(*a*) To secure a proper appreciation of the value of production as set out in the following tables it is well to keep in mind the following considerations:—The sum of the gross values of the several agents of production contains substantial duplications. The total value realised for a season's wheat, for instance, includes costs of transport, commission, and other handling charges, which items form the incomes of those performing these services. Similarly, the Local Value includes value of fertiliser, etc., used, which item will have been included in the value of manufactured production. Again, fodder grown and valued as an agricultural product would also, if fed to milch cows, be duplicated in the value of dairy production. When, however, *net* values are being ascertained, the value of such fodder consumed is deducted as a cost against dairying, thus eliminating duplication. Thus, while Gross Value represents a very accurate estimate of the value of the production of any particular industry, *only Net Values should be aggregated in arriving at a total value of "All Recorded Production."* The ratio of Marketing Costs to Gross Value of Production varies greatly as between industries. Thus, the great bulk of forestry production sustains no marketing costs, as the logs form raw material for a secondary industry (saw-milling) without being "marketed." For this reason all forest products were valued prior to the year 1933–34 at place of production before any marketing costs were incurred. Commencing with 1933–34, however, marketing costs, together with cost of goods consumed in process of production, have been taken into account where actually incurred. In any case, the statement of net values is not affected and is comparable throughout.

(*b*) As a proportion of *all* production, *recorded* production varies somewhat from year to year. On the average, total net recorded production represents slightly more than half of the net value of all goods and services produced in Western Australia.

PART VI.—INDUSTRIAL ESTABLISHMENTS (Exclusive of Mines).

DEFINITION.—For the purpose of the Statistics that follow, an Industrial Establishment is a "Factory," engaged in the manufacture, assembly, treatment, or repair of goods, in which four or more hands are employed, or power other than hand is used.

CONTENTS.

SPECIAL NOTES.—

(1) *Unless otherwise stated, figures for "Employment" include particulars of "Working Proprietors," and relate to the period of operation, which is not in all cases for the full twelve months. Contrawise particulars for "Salaries and Wages" exclude the value of "Working Proprietors'" services.*

(2) *The Net Value of Manufacture, shown herein as "Value of Production" or "Net Production," is the value added in the course of manufacture. It is derived from Output by deducting the value of goods consumed (viz., materials used; fuel, power, and light; lubricating oil; repairs to plant; containers, packings, etc.) and represents the sum available for payment of wages, rent, interest, depreciation, certain other costs (such as advertising and insurance), and for the manufacturer's own income.*

(*a*) By-product in treatment of auriferous ore. (*b*) Value in terms of Australian Currency. Nominal standard value of gold produced to end of 1950 would be approximately £227,093,964. (*c*) Includes variously Soapstone, Dolomite, Diatomaceous Earth, Talc, Graphite and Emery. (*d*) Includes Bentonite, Jarosite, Sillimanite Clay and Kaolin. (*e*) Incomplete, *see* also Table No. 16 "Quarry Production." (*f*) For Fertiliser. (*g*) Values shown for 1949 and 1950 are based on F.O.R. Norseman; values for previous years include rail freight to superphosphate works, Bassendean. (*h*) Exclusive of silver contained in Lead and Silver-Lead Ore and Concentrates exported, viz., Silver 1947, Nil; 1948, 5,987; 1949, 9,992 and 1950, 6,685 fine ozs. (*i*) As received at the Mint and contained in Gold-bearing Materials exported.

Note.—The difference between total water drawn from all sources in any one year and the total distributed is due to pipe fractures and a large proportion of unmetered consumers. Extensive flushing of Reservoirs took place in 1947. Electricity restrictions in 1949 reduced pumping at the Artesian Bores.

PART XII.—RETAIL PRICES, WAGES, EMPLOYMENT, AND MISCELLANEOUS.

I.—RETAIL PRICES

This section gives details of Retail Prices, Consumption of Foodstuffs, etc., and Retail Price Index Numbers.

RETAIL PRICES.

Retail Prices of selected groups of commodities and services are collected regularly by the Government Statistician from representative informants in the more important towns of Western Australia.

From 6 towns, prices are obtained for regimens covering (*a*) 41 items of Food and Groceries, (*b*) Rents of 4 and 5-roomed Houses, (*c*) 80 items of Adult and Juvenile Clothing, and (*d*) 27 items of Household Drapery and Utensils, and in addition, other items of Miscellaneous Expenditure, such as Fuel and Light. Prices of Food and Groceries only are collected from a more extensive list of towns. Informants are required to furnish prices monthly (prices as at the middle of the month) for Food and Groceries and quarterly (particulars as at the 15th of the middle month of each quarter) for House Rents, Clothing, and Miscellaneous items.

Specific grades and qualities have been established for the various items included in the regimen in order to ensure that all informants throughout the State shall quote consistently for articles of the same standard. The collection of data in the Metropolitan Area, Kalgoorlie-Boulder, Northam, Bunbury, and Geraldton—the "five towns" of Western Australia in the several Commonwealth retail price index series—is made under the authority of the Commonwealth Census and Statistics Act, 1905–1938. The State Statistical Department directly supervises the collection of data for the Commonwealth Statistician. The actual collection of returns is carried out by a specially qualified field officer of the Commonwealth Bureau of Census and Statistics, who is attached to the State Department. This officer checks prices and standards in the shops of informants, and inspects houses listed on the rent returns.

In those towns where returns are required under the State Statistics Act, 1907, the method of collection is substantially the same as that outlined above.

During the war years 1939-45 unusual difficulty was experienced in obtaining prices for the compilation of several of the abovementioned series, due mainly to the scarcity and sporadic supply of certain types of goods and to changes in the grade and quality of such. Difficulties were most pronounced in the case of the clothing section and the household drapery and utensils section of the miscellaneous series, necessitating in some cases the substitution of new grades, qualities or types of articles for those formerly included in the regimen, or again the adoption of various statistical devices to overcome the effects of the absence of quotations for goods temporarily off the market or in short supply.

In some measure the problem has remained under post-war conditions, as many goods are still in short supply and stocks are extremely variable. It should be noted, however, that all practicable steps are taken to preserve the statistical integrity of the index.

Food and Groceries.

The regimen of Food and Groceries commodities adopted for the several index series issued by the Australian Statisticians is set out in Table No. 1. This shows the average prices quoted by retailers in the Metropolitan Area during each month of 1950.

CONSUMPTION OF FOODSTUFFS, ETC.

No. 2.—Estimated Annual Consumption of Foodstuffs, Beverages and Tobacco.

Details of the estimated annual consumption of some of the more important food commodities consumed in Western Australia are shown in this table. Particulars of the consumption of spirituous and alcoholic liquors and tobacco preparations are also given.

The figures have been derived from records of production, imports and exports, for the years 1947–48 to 1949–50, and show the average amounts consumed annually per head of population during that period. They include quantities used in manufacturing, such as flour in biscuits, bread, etc. ; sugar in jam, and so on.

Where the necessary data were available, adjustment has been made for movement in stocks, and for exports as ships' stores.

RETAIL PRICE INDEX NUMBERS.

In this section are shown Index numbers computed from retail prices returns furnished by informants in the more important towns of the State.

These Index numbers cover selected "regimens" (or lists of commodities or services) comprising items of—

I.—Food and Groceries,

II.—Housing (Rents of 4 and 5-roomed Houses),

III.—Clothing, and

IV.—Miscellaneous Household Expenditure,

as well as combined regimens of Food, Groceries, and Housing (Groups I. and II.), and "All Items of Household Expenditure" (Groups I. to IV. inclusive)—the "B" and "C" ("All Items") Index Series respectively, of the Commonwealth Statistician.

The several Index series simply measure variations in the aggregate cost of a given regimen of commodities at various intervals of time or as between different towns, and are intended for use as approximate measures of general retail price movements in the commodity classes to which they refer. In this connection it cannot be too strongly emphasised that they do not, and are not, intended to measure an absolute "cost of living," *vide* Commonwealth Statistician's Labour Report No. 21, Appendix "Wages and Prices," page 167.

In the series set out in the following pages the Index numbers themselves represent the several "aggregates" expressed as relatives of the weighted average "aggregate cost" of the same regimen in the six capital cities over some specific interval of time, *e.g.*, the five years 1923 to 1927.

To ensure that the series shall be as reliable as possible, the commodities comprising the complete regimen have been selected to conform to the following conditions :—

1. They must be such that they can be clearly and definitely described.
2. They must be capable of standardisation, and mean the same thing at different times and places.
3. They must not be subject to violent or extreme seasonal fluctuations (hence, in general, fresh fruit and vegetables are excluded from the regimen).
4. They must be in common use, and their usage must comprise an appreciable proportion of the total consumption of the commodity group to which they relate, and moreover, remain relatively constant.
5. On the whole, they must be a fair sample of the commodity group which they purport to represent.

RETAIL INDEX NUMBERS—continued.

No. 3.—Food and Groceries—Five Principal Towns.

This table sets out Index numbers representing variations in the prices of Food and Groceries in each of the five Western Australian towns covered by the Commonwealth Statistician's inquiries. The table also gives weighted averages for the "five towns," and the six capital cities of the Commonwealth. Weighting is on a population basis.

RETAIL PRICE INDEX NUMBERS—*continued.*

No. 9.—Clothing—Five Principal Towns.

Variations in the prices of the clothing regimen are given in the table hereunder. The regimen is based on the requirements of a nominal family unit of five persons, comprising a man, woman, boy (aged 10½ years), girl (aged 7 years), and boy (aged 3½ years). These persons are taken as representative respectively of men over seventeen years, women over seventeen years, children ten to sixteen years, children five to nine years, and children under five years.

Within each section, the items are weighted according to their relative consumption by the type of person concerned, and the sectional aggregates themselves are brought together in one composite aggregate after they have been weighted in accordance with an appropriate population factor. This factor represents the proportion which each age group bears to the total population.

No. 11.—"All Items" of Household Expenditure ("C" Series)—Five Principal Towns.

This table combines together in one series, the index numbers of Food and Groceries, Housing, Clothing and Miscellaneous Expenditure appearing in the preceding pages. This is the Commonwealth Statistician's "All Items" or "C" Series index of Retail Prices. The "C" Series index numbers were adopted by the Commonwealth Court of Arbitration as the basis for the adjustment of the wages declared in its judgment of the 17th April, 1934. Since its 1937 Basic Wage judgment, the Commonwealth tribunal has been using special "Court Series" based on the "C" Series (see table No. 13, page 15).

Five Principal Towns and Six Capital Cities—Each Series.

Tables Nos. 14 to 18 compare movements among the several Index series in each of the Commonwealth Statistician's "five Western Australian towns," while Tables Nos. 19 and 20 give similar details in respect of the weighted average of these towns and the six capital cities.

Note.—Each series has been given its own base. This is the weighted average cost of the particular regimen concerned, for the six capital cities, during the period 1923–27. The Index numbers cannot, of course, be compared with each other horizontally in order to show the relative costs of the different regimens, since the base of each series has been made equal to 1000.

II.—WAGES.

No. 21.—State Basic Wage.

Under the provisions of the Industrial Arbitration Act, 1912–50, authority is vested in the State Court of Arbitration to declare an annual Basic Wage, which, until 1950, was operative from the 1st of July each year.

The first decision of the Court took effect on the 1st July, 1926, and prescribed a rate of £4 5s. 0d. for males and £2 5s. 11d. for females throughout the whole of the State. In fixing the male rate, the Court divided the wage into four elements, viz., Food and Groceries, Rent, Clothing and Miscellaneous Expenditure, and allowed amounts for each of these elements to meet the requirements of a family unit of four, comprising a man, his wife and two children. For Food and Groceries the amount was equivalent to the Piddington Commission's standard for this section (reduced to provide for a family unit of four) ; for Rent, the average rental of four and five-roomed houses ; for Clothing, an amount approximating the sum fixed for such expenditure by the New South Wales Board of Trade in 1925, and for Miscellaneous an amount based on the Piddington Commission's finding.

These rates remained unaltered until the 1st July, 1929, when the amounts were increased to £4 7s. 0d. and £2 7s. 0d. respectively, with the exception of certain specified goldfields areas, in respect of which the previous wage was retained.

A revision by the Court following the 1930 inquiry resulted in the declaration of a separate wage of £4 6s. 0d. for males and £2 6s. 5d. for females, in respect of the Metropolitan Area, and rates of £4 5s. 0d. and £2 5s. 11d. respectively for all other parts of the State.

Additional power was given the Court under the provisions of the Industrial Arbitration Act Amendment Act, 1930, to enable quarterly adjustments to be made to the annual declaration, and on the 3rd March, 1931, rates of £3 18s. 0d. for males and £2 2s. 2d. for females were prescribed for the Metropolitan Area, while all other parts of the State were fixed at £3 17s. 0d. and £2 1s. 8d. respectively.

The annual declaration operative as from the 1st July, 1931, did not vary these amounts, but a further quarterly adjustment on the 18th August, 1931, marked the inauguration of a different wage for agricultural areas, which are taken to be those areas comprised within the official South-West Land Division as gazetted under the Land Act.

Wage levels in all divisions of the State were considerably increased as from the 1st July, 1938, following the most comprehensive inquiry since the original declaration. In the course of the 1938 inquiry, special consideration was given to the factors of National Income and Standard of Nutrition. In the case of the Rent and Miscellaneous elements of the wage the "old" standards remained unchanged. For Clothing, however, the Court adopted the Piddington "standard"—reduced to provide for a family unit of four—and for Food and Groceries, the Piddington standard plus an amount of 1s.

At a sitting of the Court held on 26th February, 1942, to consider the quarterly adjustment of the basic wage, the Court decided that, in the light of existing economic conditions, there should be no alteration to the rates then in force. This decision marked the first occasion upon which the Court, in the exercise of the discretionary powers conferred upon it under the Act, had refrained from making a quarterly adjustment to the wage to equate its purchasing power to the "standards" of the relevant annual declaration. It was followed by a similar decision given on 29th April, 1942, when the Court reaffirmed that no adjustment would be made to existing rates, despite further increases in retail prices.

On 11th June, 1942, the Court in its annual declaration adopted the rates which had operated since 28th July, 1941, as its new base, and these remained in force until 8th August, 1942, when they were superseded by a Basic Wage Adjustment Order made by the Premier on 7th August under the authority of National Security (Economic Organisation) Regulations. The rates established under this Order were substantially the current equivalents of the standards adopted by the Court in its annual declarations, 1938-1941.

These standards were re-adopted by the Court for the purposes of the quarterly adjustments made on the 30th October, 1942, and subsequently until the Court's Interim Basic Wage Declaration of the 26th February, 1947. In this declaration which was made under powers conferred by an amendment (December, 1946) to National Security (Economic Organisation) Regulations the basic wage was increased by a loading of 5s. This loading was varied proportionately to the remainder of the basic wage in subsequent declarations and quarterly adjustments.

The Industrial Arbitration Act Amendment Act of 1950 provided, *inter alia*, (1) that basic wage determinations may be made at any time during the year at intervals of not less than twelve months subject only to quarterly adjustments and (2) that in such determination the Court must give due consideration to the economic capacity of industry. Pursuant to this enactment and subsequent to the judgment of the Commonwealth Court, the State Court increased the basic wage in all Divisions by £1 for males and 15s. for females as from the 18th December, 1950. It also decided in February, 1951, that subsequent quarterly adjustments should be based on variations in the "C" Series (All Items) Retail Prices Index Numbers.

The following table shows annual declarations and certain interim variations since the original decision of 1926, which remained unaltered until 1st July, 1929.

No. 22.—Commonwealth Basic Wage.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined in Section 25 as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The section contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage (including " loadings ") payable to an adult unskilled labourer. (A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill.")

The history of the Commonwealth basic wage is summarized below :—

(1) Until 1934, rates were based on the " Harvester " judgment delivered by Mr. Justice Higgins in 1907, which fixed 42s. per week for Melbourne as a reasonable amount to meet the needs of " a family of about five."

From 1913 up to the end of 1921, the basic wage was simply a " Harvester " equivalent, rates being fixed by varying the original Harvester wage in accordance with movements in the purchasing power of money as disclosed by the Commonwealth Statistician's " A " Series index numbers covering items of food and groceries and rents of " all houses." Up to 1918 the Court, in computing " Harvester " equivalents, used the index numbers for the previous calendar year. From 1918 to the end of 1921 the figures for the next preceding four quarters were used, and from 1921 onwards the index numbers for the latest quarter available. In that year the Court began to insert provisions in awards for the automatic adjustment of wages according to quarterly movements in the " A " Series index, and a loading—subsequently known as the "Powers 3s."—was added to the " Harvester " equivalent by Mr. Justice Powers to ensure that over a period of rapidly rising prices the worker would suffer no loss of real wages in the interval between the adjustment of rates.

The method of fixation and adjustment remained unaltered until after the onset of the depression. Then in 1931 the Court, having satisfied itself that unfavourable economic conditions prevented the maintenance of real wages at their existing level, directed that, with certain exceptions, all wages under its jurisdiction should be reduced by 10 per cent. as from the 1st February of that year.

In its judgment of May, 1933, the Court concluded that the method of adjusting wages to conform to variations in the "A" Series index numbers had resulted in a decrease of real wages beyond the prescribed percentage. To correct this movement it adopted the use of the " D " Series index.

(2) In a judgment delivered in April, 1934, the Court introduced an entirely new basis for the fixation of the basic wage. The " Harvester " standard supplemented by the Powers loading was discarded and a fresh starting point selected. The new wage was largely founded upon a declaration of 84s. per week made by the New South Wales Board of Trade in August, 1925. As this amount took into consideration the upward tendency of prices, the Court regarded the rate as applicable to the year 1926. The " C " Series index number for Sydney for that year was 1033, and for the December quarter of 1933 stood at 829. Thus an amount of 84s. in 1926 had the same purchasing power as 67s. in 1933, which became the rate applicable in Sydney from the 1st May, 1934. The equation of this wage to the index number 829 established the relationship, 1000 in the " C " Series index = 81s. in the wage and, by applying the factor 0·081 to the " C " Series index number for any town or group of towns at any time, the wage in shillings could be readily computed. Owing to adverse industrial conditions in South Australia and Tasmania, the new rates for Hobart and Adelaide were graduated so as not to come into full operation until the 1st June, 1935. The date on which future periodical adjustments were to become operative was altered to the first pay period in the months of June, September, December and March. Adjustments were continued on this basis until 1940, since when they have taken effect from the beginning of the second month after the end of each quarter.

(3) The hearing of a claim by the combined unions for an increase in the basic wage was concluded in June, 1937. The Court, in fixing a new rate, transferred the basis of the adjustment of wages from the " C " Series to a special " Court " Series based upon the relationship between wages and index numbers which had been established in 1934. This Court Series was, in effect, nothing more than a table expressing in shillings the wage rates derived by the use of the conversion factor 0·081. The Court's judgment further provided for the addition of " prosperity loadings " to the rates so derived, which came to be designated the " needs portion " of the wage. The amount of the loading applied to the " needs " wage for Sydney, Melbourne and Brisbane was 6s., for Adelaide, Perth and Hobart, 4s. and for the Six Capital Cities as a whole, 5s.

(4) In general, the method of the 1937 judgment was retained by the Court until its " interim " decision of the 13th December, 1946 when, in granting an increase of 7s. per week in the " needs " portion of the wage, it inaugurated a Court Index (Second Series). In fixing the base of this new series, the " C " Series index number (1146) for the Six Capital Cities as a whole in the Septem-

ber quarter, 1946 was equated to the "needs" portion (100s.) of the new Six Capitals wage. This established the base, 1000 in the "C" Series index = 87s. in the wage. The immediate monetary effect was to increase by 7s. per week the "needs" wage in each of the capital cities with the exception of Hobart, where the increase was 6s. The prosperity loadings were retained at their original levels.

(5) On the application early in 1949 of certain unions seeking, among other things, an increase in the basic wage the Court, after an exhaustive examination of the Australian economy, declared a general increase of 20s. per week. Judgment was delivered on the 12th October, 1950, the new rates to be operative from the first pay period in December. The Court also introduced a Court Index (Third Series) based upon the equation of 1572 (the "C" Series index number for the Six Capital Cities as a whole in the September quarter, 1950) to 162s., the increased weighted average wage for the Six Capitals (made up of the "needs" portion 137s., plus a uniform prosperity loading of 5s., plus the additional 20s. awarded by the Court). In this way, 1000 in the "C" Series index became equal to 103s. in the wage. In determining the new rate of payment, a uniform amount of 25s. was added to the existing "needs" basic wage, with the concurrent discontinuance of the prosperity loading as a separate entity. This had the effect of increasing the basic wage in Sydney, Melbourne and Brisbane by 19s., in Adelaide, Perth and Hobart by 21s., and for the Six Capital Cities as a whole by 20s. From, and including, the first pay period in February, 1951 the rates so determined were to be subject in their entirety to quarterly adjustment in accordance with movements in the Court Index (Third Series). Thus the components "needs portion" and "prosperity loading" ceased to exist as separate and distinguishable parts of the wage.

Commonwealth Basic Wage rates (including "prosperity loadings") payable in each of the capital cities since 1934 are shown in the following table:—

(*a*) Includes persons who were (1) unable to secure employment ; (2) temporarily laid off from their jobs ; and (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason.

NOTES.

1. Wage earners who were employed part-time in 1933 were asked to indicate that fact on the Census Schedule in answer to the question regarding occupational status, and all those who so described themselves are included in the work force for that year. In 1947, however, persons working regularly, but for considerably less than normal working hours, were instructed on the Census Schedule to exclude themselves from the work force unless their earnings from such work formed their principal means of livelihood.

2. Minus sign (–) denotes decrease.

No. 25.—Index of Employment in Factories.

The annual mean employment in factories for the year 1928–29 (19,799) has been taken as base, = 100, in the index series shown below. Figures have been computed from particulars obtained in respect of the whole field of factory employment. It should be noted that there is a break in the continuity of the series between June and July, 1935, owing to the inclusion from the latter month onwards of certain factories previously not included. To this extent the index numbers to June, 1935, are not strictly comparable with those following.

(*a*) Private houses shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished.

(*b*) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

(*c*) " Unoccupied dwellings " include " week-end " and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census.

(*d*) " Dwellings being built " relate to unoccupied dwellings of all types being built at 30th June, 1947, and are not identical with the number of houses under construction at the time of the Census.

Private Houses and shares thereof represented 93.4 per cent. of all occupied dwellings in Western Australia in 1947, whilst flats and tenements combined were 4.4 per cent., and boarding houses, hotels and other occupied dwellings were 2.2 per cent.

SPECIAL NOTE.

Prior to the year 1837 no Blue Books were issued, and figures relative to arrivals and departures, shipping, imports, and exports have been taken from the reports of the Harbour Master at Fremantle or from Perth newspapers of the period. From 1838 to 1859, inclusive, migration figures show only the excess of arrivals over departures or vice versa.

(a) The index numbers appearing in these four columns, *for any given period*, cannot be compared to show the relative costs of the groups since the cost in each group in 1923-27 is made equal to 1,000.

(b) The All Items "C" Series index figures combine together in one series the index numbers relating to food, groceries, housing, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure. They may be used directly to show the relative level of costs in different places and at different times.
